Carson, CA, June 1, 2016, E.V. Roberts – a leading distributor, manufacturer and packager of advanced engineered materials for aerospace, composites, electronics, automotive, and other specialty industries – today announced its designation by Applied Aerospace Structures Corporation (AASC) as a 2016 Supplier Excellence Award recipient, earning placement in the top 2% of all Applied Aerospace suppliers.

The award was first formalized in 2007, and recognizes superior performance in four main areas: quality, on-time delivery, documentation, and customer service. E.V. Roberts won the award in 2012, 2014, and again this year.

For E.V. Roberts, that achievement is founded on a 75+ year commitment to serving the aerospace industry, with a daily focus on delivering product and service excellence to Applied Aerospace and the thousands of other customers that it serves.

Early on, the company made the decision to invest in a proprietary Enterprise Resource Planning system and develop a quality management process designed entirely around the needs of its highly technical aerospace customer base, as well as those in other high-quality and complex markets.

As a stamp of this commitment, E.V. Roberts has gone on to establish and audit its own [Accuracy Verified Program](#), guaranteeing 100% inspection of every order from the point of entry to the point of shipment.

Ron Cloud, CEO of E.V. Roberts, elaborated on what the Applied Aerospace designation means to his company. “Receiving an Applied Aerospace Structures Corporation Supplier Excellence Award is a true honor, and it reaffirms that we have chosen to invest in all the right areas. Aerospace is unlike any other industry in that quality, accuracy, and service are, quite simply, non-negotiable. The award recognizes that fact, and celebrates the value we provide as an organization that continues to set us apart.”

###

E.V. Roberts is a full-service supplier of advanced engineered materials for aerospace, composites, electronics, automotive, and other specialty industries. We are fully AS- and ISO-certified and authorized to distribute 3M, Henkel, and Momentive adhesives and films, sealants, surface treatment technologies, resins, curing agents and more, and can easily source and supply other specialty materials upon request. Resin Formulators – the custom formulation division of the company, manufactures custom solutions to meet any need, while our dispensing and packaging business delivers technologies for precision and efficiency with every application. For 75+ years, E.V. Roberts has delivered superior engineered materials with impeccable support to thousands of customers from more than 65 countries around the globe.
