

BONDERITE® M-CR 1132 M AERO Pen

The Henkel BONDERITE® M-CR 1132 M AERO Pen* is a miniature version of the BONDERITE® M-CR 1132 AERO Touch-N-Prep® AERO pen. This smaller format is ideal for coating the inside of fastener holes and harder to reach areas.

Designed to save labor, materials, and time, this product provides a dry-in-place military approved specification chromate conversion coating for touch-up applications, offering the same ease and safety as the traditional Touch-N-Prep® AERO pen.

Benefits:

- Optimal penetration/reach in 3/16” holes to treat fastener holes
- Smaller size pen to mitigate waste for a truly one-and-done solution (5ml vs. 35 ml Pen)
- Reduces worker contact to chromating solutions and waste, such as rinse water generated from other chromating processes

BONDERITE® M-CR 1132 M AERO Pen use instructions on the back.

*Before starting the application procedure, it is necessary to become familiar with the mechanics of the pen itself.

BONDERITE® M-CR 1132 M AERO Pen Instructions

Step 1:

Remove the cap.

Step 2:

Remove the existing tip.

Step 3:

Insert replacement tip.

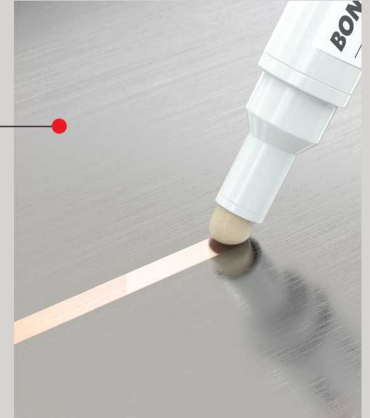

Step 4:

Hold the pen vertically and press its tip firmly onto the surface to saturate it with the liquid conversion coating solution.

Step 5:

Apply BONDERITE® pen solution to the aluminum surface.

Step 6:

Discard the replacement tip after use and cap the Touch-N-Prep®.
