

# COVID-19 Film Barrier

During this global pandemic, Mask-Off has created opportunities to help businesses prepare to operate and keep employees, vendors and customers safe. Our product options can be used to create the required, optically clear barrier without paying the extremely high price for Plexiglass.

\*PVC not included

## Protex 8216-2DSHT

The 8216-2DSHT is known by our aerospace customers as a Debris Shield. This 36" 2 mil polyester has 7 inches of acrylic adhesive on the ends, creating an optically clear viewing window in the center.

Wrap and adhere the product around the stand. The adhesive sticking to the frame and the polyester film provides a secure and stable barrier

\*PVC not included

## Polyester (No Adhesive)

We are also offering the option of optically clear 2 mil and 5 mil polyester without adhesive to create a clean professional separation. Both options will function as effectively as Plexiglass without the excessive cost.

Secure the polyester to the frame using screws, nuts and bolts, zip ties or double sided tape

\*PVC not included
