

HIGH-PERFORMANCE PAINTS AND COATINGS FOR YOUR AEROSPACE NEEDS.

As an authorized distributor for AkzoNobel, we offer high-performance coating solutions for the MRO, defense, structural, and general aviation industries.

We take great pride as the only distributor of AkzoNobel aerospace coatings with a color lab and exclusive authorization to color blend and repackage. Our Intermix Color Lab is renowned for color matching, color tinting, and quality systems for the aerospace industry.

Intermix paint services provide color tinting and blending of up to 10,000 possible colors. If AkzoNobel does not supply the color your project requires, our lab is able to match it and certify products in record time – saving six to eight weeks for the customer.

We offer the following product lines:

- » **Eclipse Series**- Commercial Aviation
- » **Alumigrip** - General Aviation
- » **58 Series per MIL-PRF-85285** - Military or Commercial Aviation

Our customers benefit from our capabilities including:

- » Short lead times
- » AOG expediting
- » Factory pack
- » Tinting and custom color matching
- » Repacking and small kit sizing
- » MIL-PRF-85285 Certification with test report

INTERMIX PAINT SERVICES

COMMITMENT TO QUALITY AND SERVICE

GracoRoberts and Resin Formulators are fully qualified to design, manufacture, and distribute products to a variety of industries. We are independently certified to three rigorous international quality standards: ISO 9001:2015, AS9100 (Rev. D) and AS9120 (Rev. B). To verify compliance with the requirements of these certifications, we engage in routine on-site examinations, self-reviews, and audits of our processes.

That, coupled with our standing as the only distributor/manufacturer to guarantee 100% inspection of every order from the point-of-entry to the point-of-shipment, ensures that the necessary controls are in place.

CASE STUDY: REDUCING AOG MAINTENANCE TIME

A large aviation maintenance and repair operations service provider was in need of Boeing exterior paint to support a 737-700 NG series aircraft that was down for maintenance. They required a manufacturer’s certificate of conformance to accompany the paint, and needed it as soon as possible. The original paint they requested had a longer lead time and was not able to be certified in time. Our AOG emergency staff was able to supply AkzoNobel Alumigrip 4250 series BAC color BAC93804 for the application, complete the order, produce the paint through our AkzoNobel-approved GracoRoberts’ tint line, and ship on a Saturday to ensure the customer would receive in time. The MRO shop was very pleased with the speed of service and was able to reduce AOG maintenance time drastically, turning the aircraft around for service before the due date, and saving money, in the process.

MEET YOUR EXPERTS

DAN JOHNSON, FIELD PAINT SPECIALIST

Dan Johnson is the veteran Field Paint Specialist at GracoRoberts and has specialized in technical consultation for high-performance coating solutions for over four decades. His extensive product knowledge and tenure in the industry positions him as an expert in automatic spray guns and systems, paint booths, custom color matching, and paint demonstrations for commercial, military, and general aerospace high-performance coatings. Dan is eager to consult on your next project and give you the personal support and technical expertise you need to succeed.
